Hi-Tech Alarms is a family run business specialising in the field of security covering most of the Yorkshire area. With over 20 years of trading history you can be confident you're in safe hands.

We have partnered with the leading UK manufacturer of intruder alarm equipment to bring you the latest technology available. Fully wireless installation is fast and efficient and requires no intrusive work to your new home.

Consisting of;

- 40 zone wireless control panel with built in keypad
- Illuminating external bell box
- Includes 5 devices - PIR detectors/door contacts/vibration detectors
- 2 x Prox tags for set/unset at keypad and codes can also be used
- Wi-Fi-module allows alarm to be set/unset and receive alerts remotely via the control plus app on your smart phone*
- Fully installed
- 12 months warranty
- Option to upgrade keypad to touchscreen
- Option to add additional wireless devices
- Optional remote fob for set/unset away from keypad with built in panic button

**Installed
for as little
as £550**

*Wi-Fi module needs a high speed broad band connection in place prior to work commencing (not included). Poor internet speeds/drops in connectivity can affect ability to set remotely via app.

Wireless batteries in each piece of equipment will need replacing every 12 months dependent on usage and in accordance with manufacturer's guidelines, this can be carried out at time of annual alarm service (can be quoted).

Wireless installation is dependent on the signal strength at the property at time of install.
